

## **Tutorial #5**

### **Carbon Footprinting for Electronics**

September 9, 14:45 - 18:00

Karsten Schischke, Marina Proske (Fraunhofer IZM)

Price: 250/295 €

- Product carbon footprints, company accounting and carbon footprint information along the supply chain, all these are data which are assessed and published more and more in the last years.
- As carbon footprinting is never an easy topic, there are several issues which are particularly difficult regarding electronics and ICT products. In this tutorial, an overview of current methodological developments regarding the assessment of ICT products and examples from industry are given.
